

## CONCEPT – 02 : Complete Structural Formulae

### TOPIC – 02 : Condensed Structural Formulae

The condensed structural formula is used to save Space, structural formulas are conveniently abbreviated as condensed structural formula. This is a system for writing organic compounds in a single line. It's a method that use a sort of shorthand notation to convey more information than a chemical formula. Condensed structural formula (CSF) is a language-based method of expressing molecules.

e.g.

Propane

Ethane

Pentane

Ethanol

Pentane

Hexan-3-ol
